

Amendments to the Specification

Please replace the paragraph [0083] at page 18, with the following rewritten paragraph:

[0083] The attribute information converting unit 13 reads out latitude and longitude of a shooting location, which is attribute information of an image file, and decides whether the latitude and the longitude respectively correspond to "Aomori prefecture" or not. If it decides the latitude and the longitude correspond to "Aomori prefecture", it converts the latitude and the longitude to "Aomori prefecture", and transmits it to the data controlling unit 16.

Please replace the paragraph [0103] at page 23, with the following rewritten paragraph:

[0103] Next, calculate x that satisfies a following formula, Formula 3 using a number of thumbnails, k_{\max} , in a horizontal axis direction calculated from the above (Formula-3 2).

Please replace the paragraph [0245] at page 51, with the following rewritten paragraph:

[0245] The two-dimensional page drawing unit 32 may make drawing regardless of the classification display sequence. For example, it draws in a sequence of the drawing list shown in Fig. 10, and retains these drawn thumbnail display pages 2. Besides, it may output these drawn thumbnail display pages 2 into the two-dimensional image deforming unit 33 according to the classification type display sequence.
